Working with ECCNs is a real challenge.

ECCN determination and management is an important part of US export compliance. Non-compliance can mean penalties, shipment delays or even loss of export privileges. But finding the right ECCN for your products – and managing your ECCNs once you’ve found them – is a daunting task.

Our tools can help.

Our ECCN Analyst™, with its comprehensive ECCN determination and reference capabilities, is an ideal solution for your ECCN challenges.

Whether you’re just classifying a few controlled items, or you’ve got a large database of ECCNs that’s getting hard to manage, the ECCN Analyst™ can help you master your ECCN processes.

Page Title/Headline: Having Difficulty finding an ECCN number?

Stop Googling “ECCN.” Start finding the ECCN info you *really* need.

Someone tells you they need an ECCN for an item they need to ship and of course, they need it right away. Sound familiar? Unfortunately finding that ECCN – calling BIS, searching government Web sites – isn’t as easy as it sounds.

That’s where our **ECCN Analyst™** solution comes in.

Find the correct ECCN Faster.

The ECCN Analyst™ is a sophisticated search method that helps you determine:

- a) If your item requires an ECCN;
- b) If so, what the most appropriate ECCN is.

Get the most accurate search results.

Once you’ve determined the correct ECCN, our comprehensive library gives you an efficient, easy-to-use method of storing your ECCNs for future reference and use, so you can be prepared the next time someone comes looking for information.

And, after you’ve used our solution to determine your ECCN, you can utilize the **License Determination Assistant** to determine what export licensing requirements apply when exported to a particular country, and any available license exceptions.

Stop wasting time doing manual searches and be prepared the next time someone asks you to find an ECCN. **Contact us today for trial access** and see how the ECCN Analyst™ can simplify and improve your export processes.

Page Title/Headline: Struggling to manage your ECCN process?

You need an easy, efficient solution for managing your ECCN processes.

You’ve done your due diligence and you’re confident you know the right ECCNs for your controlled goods. But how are you managing this important, sensitive data? Spreadsheets? Post-it notes attached to your monitor?

There’s a better way: our ECCN Analyst™ solution features a comprehensive library where you can store, reference and recall all of your ECCN data.

Manage your ECCN processes effectively.

Our solution is more than just a data repository for your existing ECCN data – it’s also a powerful search system that you can use to determine whether additional, future items require ECCNs. Our reference and classification data is always up-to-date, so you can be sure you’re working with the most accurate, timely information, straight from U.S. government sources.

Establish and maintain compliance best practices.

What’s more, as part of our suite of export compliance tools, you can manage all of your compliance responsibilities, including restricted party screening and license determination, from a single, centralized location.

From determining your ECCNs, to storing them in a secure, easy-to-access system, to managing all of your export compliance duties: we offer a complete, export compliance platform with multiple configuration and deployment options.

Contact us to set up a product demo, and get the ECCN Analyst™ working for you.
